

March 1, 2015

Dear Ann Kobayashi and the Budget Committee:

Thank you for considering Bill 10, relating to Car Sharing in Honolulu.

I strongly support Bill 10. Car Sharing in Honolulu will offer people another viable (and desirable) mode of transportation, allowing people to drive less, and utilize public transportation more.

Car sharing is a key piece that makes Rail viable for our island. Because the Rail does not go "everywhere," car sharing helps people complete their route to their final destination. I also feel car share's presence will encourage greater use of Rail to solve our growing traffic problem.

Car sharing supports Hawaii's collective vision for us to live in a dynamic, affordable, community-based city. Car sharing moves us further to this place. A successful public transportation system in Hawaii (*with* car share) will give people options for reducing their cost of living and their carbon footprint.

Thank you for supporting Car share and a vision for Honolulu that will build greater community and sustainability.
